

**UNITED STATES DISTRICT COURT
DISTRICT OF NEW MEXICO**

**ANGELA GALLEGOS as personal
Representative of the Estate of
ROBERT D. GALLEGOS, deceased**
Plaintiff,

VS.

**COOK INCORPORATED;
COOK MEDICAL LLC f/k/a COOK
MEDICAL INCORPORATED; and
COOK GROUP INCORPORATED**
Defendants.

Plaintiff's Complaint and Demand for Jury Trial

Civil Action No.

COMPLAINT AND DEMAND FOR JURY TRIAL

Plaintiff ANGELA GALLEGOS as personal representative of the estate of ROBERT D. GALLEGOS, deceased, (hereinafter “Plaintiff”), by and through her attorneys, hereby files this, Plaintiff’s Complaint and Demand for Jury Trial, against Defendants COOK INCORPORATED, COOK MEDICAL LLC f/k/a COOK MEDICAL INCORPORATED; and COOK GROUP INCORPORATED, and alleges the following:

1. This is an action for damages relating to Defendants’ development, testing, assembling, manufacture, packaging, labeling, preparing, distribution, marketing, supplying, and/or selling defective product sold under the name “inferior vena cava filter” (hereinafter “IVC filter”).

2. Cook IVC Filters are associated with, and cause, an increased risk for serious injury and death as a result of adverse events including tilting, perforation, fracture, breakage and migration.

3. At all times relevant to this action, Cook intentionally, recklessly, and/or negligently failed to act as to the known failures and injuries associated with its devices and/or failed to warn about and concealed, suppressed, omitted, and/or misrepresented the risks, dangers, defects and disadvantages of its IVC Filters.

4. At all times relevant to this action, Cook intentionally, recklessly, and/or negligently advertised, labeled, promoted, marketed, sold and/or distributed its IVC Filters as a safe medical device when in fact Cook had reason to know, and/or did know, that its IVC Filters were not safe for its intended purposes, and that its IVC Filters caused serious injury and death.

5. At all times relevant to this action, Cook is and was strictly liable for injuries caused by its IVC Filters because the devices are unreasonably dangerous and not accompanied by adequate warnings about its danger.

PARTIES

6. Plaintiff Angela Gallegos is the natural surviving mother of Robert D. Gallegos (“Decedent”). She is a citizen and resident of Rio Arriba County in the state of New Mexico. Robert D. Gallegos died on April 14, 2022.

7. Plaintiff Angela Gallegos was appointed as Personal Representative of the Estate of Robert D. Gallegos on August 12, 2022, by the Honorable Dennis K. Wallin in the New Mexico Probate Court of the County of Rio Arriba.

8. Defendant Cook Incorporated is an Indiana Corporation with its principal place of business located at 750 Daniels Way, P.O. Box 489, Bloomington, Indiana 47404. On information and belief, Cook Incorporated is a privately-owned corporation with wholly owned subsidiaries that it controlled, including Cook Medical, LLC f/k/a Cook Medical Incorporated, and Cook Group Incorporated.

9. Defendant Cook Medical, LLC is a privately-owned Indiana limited liability company with its principal place of business located at 1025 West Acuff Road, Bloomington, Indiana 47404. Cook Medical, LLC was formerly known as Cook Medical Incorporated.

10. Defendant Cook Group Incorporated is an Indiana Corporation with its principal place of business located at 750 Daniels Way, P.O. Box 489, Bloomington, Indiana 47404.

11. Defendants Cook Incorporated, Cook Medical LLC f/k/a Cook Medical Incorporated, and Cook Group Incorporated are hereinafter collectively referred to as “Cook Defendants” or “Cook.”

12. At all relevant times, the Cook Defendants were in the business of designing, setting specifications for, manufacturing, preparing, compounding, assembling, processing, marketing, packaging, and selling Cook Tulip inferior vena cava (“IVC”) filters to distributors and sellers, including hospitals, for implantation by physicians at hospitals in patients throughout the United States, including in New Mexico.

13. At all relevant times, each of the Cook Defendants regularly marketed, distributed and sold Tulip filters throughout New Mexico and sold the Tulip filter in New Mexico for resale and implantation into human patients.

14. At all relevant times, each of the Cook Defendants and their directors and officers acted within the scope of their authority. At all relevant times each Cook defendant was responsible for each other’s actions and inactions; and each Cook defendant acted on behalf of each other Cook defendant.

15. At all relevant times, the Cook Defendants possessed a unity of interest between themselves and Cook. Cook exercised control over its subsidiaries and affiliates. As such, each

Cook Defendant is responsible jointly and severally to Plaintiff for his injuries, losses and damages.

JURISDICTION AND VENUE

16. The Court has subject matter jurisdiction over this matter because the parties are citizens of different states and the amount in controversy exceeds \$75,000.

17. The Court has personal jurisdiction over the Cook Defendants because they have sufficient minimum contacts such that asserting jurisdiction over the defendants does not offend traditional notions of fair play and substantial justice. *International Shoe v. Washington*, 326 U.S. 310, 325 (1945).

18. Venue is proper in this district because a substantial part of the events or omissions giving rise to Plaintiff's claims occurred in this district. *See* 28 U.S.C. § 1391(b)(2).

FACTUAL BACKGROUND

COOK INFERIOR VENA CAVA FILTERS GENERALLY

19. Defendants design, research, develop, manufacturer, test, market, advertise, promote, distribute, and sell products that are sold to and marketed to prevent, among other things, recurrent pulmonary embolism via placement in the vena cava. Defendants' products include the Cook Celect Vena Cava Filter and the Gunther Tulip Filter (collectively referred to herein, including the filter implanted in Decedent described below, as "Cook Filters"), which are introduced via a coaxial introducer sheath system.

20. Defendants sought Food and Drug Administration ("FDA") approval to market the Cook Filters and/or its components under Section 510(k) of the Medical Device Amendment.

21. Section 510(k) allows marketing of medical devices if the device is substantially equivalent to other legally marketed predicate devices without formal review for the safety or

efficacy of the said device. The FDA explained the difference between the 510(k) process and the more rigorous “premarket approval” process in an amicus brief filed with the Third Circuit in *Horn v. Thoratec Corp.*, 376 F.3d 163, 167 (3d Cir. 2004):

A manufacturer can obtain an FDA finding of “substantial equivalence” by submitting a premarket notification to the agency in accordance with section 510(k)...A device found to be ‘substantially equivalent’ to a predicate device is said to be “cleared” by FDA (as opposed to “approved” by the agency under a [premarket approval]). A pre-market notification submitted under 510(k) is thus entirely different from a [pre-market approval] which must include data sufficient to demonstrate that the device is safe and effective. (Emphasis in original).

22. In *Medtronic, Inc. v. Lohr*, 518 U.S. 470, 478-79 (1996), the Supreme Court similarly described the 510(k) process, observing:

If the FDA concludes on the basis of the [manufacturer’s] §510(k) notification that the device is ‘substantially equivalent’ to a pre-existing device, it can be marketed without further regulatory analysis...The §510(k) notification process is by no means comparable to the [premarket approval] process; in contrast to the 1,200 hours necessary to complete a PMA review, the §510(k) review is completed in average of 20 hours...Section §510(k) notification requires little information, rarely elicits a negative response from the FDA, and gets process quickly.

23. An IVC filter, like the Cook Filters, is a device designed to filter blood clots (called “thrombi”) that travel from the lower portions of the body to the heart and lungs. IVC filters may be designed to be implanted, either temporarily or permanently, within the vena cava.

24. The inferior vena cava is a vein that returns blood to the heart from the lower portion of the body. In certain people, and for various reasons, thrombi travel from vessels in the legs and

pelvis, through the vena cava into the lungs. Often these thrombi develop in the deep leg veins. The thrombi are called “deep vein thrombosis” or DVT. Once the thrombi reach the lungs they are considered “pulmonary emboli” or PE. An IVC filter, like the Cook IVC Filters, is designed to prevent thromboembolic events.

25. The Cook Filters are retrievable filters.

26. The Cook Celect[®] Vena Cava Filter has four (4) anchoring struts for fixation and eight (8) independent secondary struts to improve self-centering and clot trapping.

27. The Gunther Tulip[®] Vena Cava Filter has a top hook and (4) anchoring struts for fixation and on each strut, it has a “flower” formation that is shorter than the strut where a wire piece branches out on each side of the strut forming an overall “flower” type formation on each strut.

28. At all times relevant hereto, the Cook Filters were widely advertised and promoted by the Defendants as safe and effective treatment for prevention of recurrent pulmonary embolism via placement in the vena cava. At all times relevant hereto, Defendants knew its Cook Filters were defective and knew that defect was attributable to the design’s failure to withstand the normal anatomical and physiological loading cycles exerted *in vivo*.

29. A retrospective review of all Cook Gunther Tulip Filters and Cook Celect filters retrieved between July 2006 and February 2008 was performed. One hundred and thirty (130) filter retrievals were attempted but in 33 cases, the standard retrieval technique failed. The authors concluded that “unsuccessful retrieval was due to significant endothelialization and caval penetration” and that “hook endothelialization is the main factor resulting in failed retrieval and continues to be a limitation with these filters.” O. Doody, et al.; “Assessment of Snared-Loop

Technique When Standard Retrieval of Inferior Vena Cava Filters Fail” Cardiovasc Intervent Radiol (Sept 4, 2008, Technical Note).

30. A retrospective review of 115 patients who underwent Cook Celest IVC filter insertion between December 2005 and October 2007 was performed. While filter insertion was successful in all patients, the authors also concluded that “[f]ailed retrieval secondary to hook endothelialization continues to be an issue with this filter.” O. Doody, et al; Journal of Medical Imaging and Radiation Oncology “Initial Experience in 115 patients with the retrievable Cook Celest vena cava filter” 53 (2009) 64-68 (original article).

31. In a review of clinical data related to 73 patients who had Celest IVC filter implanted between August 2007 and June 2008, the authors found that the Celest IVC filter was related to a high incidence of caval filter leg penetration. Immediately after fluoroscopy-guided filter deployment in 61 patients, four filters (6.5%) showed significant tilt. Follow-up abdominal CT in 18 patients demonstrated filter related problems in 7 (39%), which included penetration of filter legs in 4 and fracture/migration of filter components in 1.

32. In a study of Gunther Tulip and Celest IVC filters implanted between July 2007 and May of 2009 reported by Cardiovascular Interventional Radiology electronically on March 30, 2011, and published by journal in April 2012, one hundred percent of the Cook Celest filters and Gunther Tulip filters imaged after 71 days of implant caused some degree of filter perforation of the venal caval wall. Durack JC, et al, Cardiovasc Intervent Radiol., “Perforation of the IVC: rule rather than the exception after longer indwelling times for the Gunther Tulip and Celest Retrievable Filters,” 2012 Apr.; 35(2):299-308. Epub 2011 Mar 30. The authors concluded: "Although infrequently reported in the clinical literature, clinical sequelae from IVC filter

components breaching the vena cava can be significant.” Defendants knew or should have known that their IVC filters were more likely than not to perforate the vena cava wall.

33. This same study reported that tilt was seen in 20 out of 50 (40%) of the implanted Gunther Tulip and Celest IVC filters and all tilted filters also demonstrated vena caval perforation. Defendants knew or should have known that their IVC filters were more likely than not tilt and to perforate.

34. While not inclusive of all medical studies published during the relevant time period, the above references show that the Defendants failed to disclose to physicians, patients and/or Plaintiff that its Cook Filters were subject to breakage, tilt, inability of removal, and migration even though they knew or should have known the same was true.

35. At all times relevant hereto, the Defendants continued to promote the Cook Filter as safe and effective even when inadequate clinical trials had been performed to support long or short to safety and/or efficacy.

36. The Defendants concealed the known risks and failed to warn of known or scientifically knowable dangers and risks associated with the Cook Filters, as aforesaid.

37. The Cook Filters are constructed of conichrome.

38. The Defendants specifically advertise the conichrome construction of the filter as a frame which “reduces the risk of fracture.”

39. The failure of the Cook Filters is attributable, in part, to the fact that the Cook Filters suffer from a design defect causing it to be unable to withstand the normal anatomical and physiological loading cycles exerted *in vivo*.

40. At all times relevant hereto, the Defendants failed to provide sufficient warnings and instructions that would have put Plaintiff and the general public on notice of the dangers and

adverse effects caused by implantation of the Cook Filters, including, but not limited to the design's failure to withstand the normal anatomical and physiological loading cycles exerted *in vivo*.

41. The Cook Filters were designed, manufactured, distributed, sold and/or supplied by the Defendants, and were marketed while defective due to the inadequate warnings, instructions, labeling, and/or inadequate testing in light of Defendants' knowledge of the products' failure and serious adverse events.

42. That at all times relevant hereto, the officers and/or directors of the Defendants named herein participated in, authorized and/or directed the production and promotion of the aforementioned products when they knew or should have known of the hazardous and dangerous propensities of the said products, and thereby actively participated in the tortious conduct that resulted in the injuries suffered by the Plaintiff.

DECEDENT'S COOK FILTER AND INJURIES

43. On or about December 10, 2010, Decedent was implanted with a Cook Gunther Tulip Vena Cava Filter at Christus St. Vincent Regional Medical Center, Santa Fe, New Mexico 87505. The procedure was completed by Dr. Thomas Burdick.

44. On or about March 9, 2022, Decedent underwent a computed tomography (CT) scan. The imaging from the CT scan showed that the legs of Decedent's Gunther Tulip IVC Filter had penetrated his IVC and gone into his pancreas, duodenum, and were also near his renal vein.

45. On or about April 12, 2022, Robert Gallegos passed away. His death certificate lists intracerebral hemorrhage, chronic anticoagulation, and deep venous thrombosis as the causes of death.

COUNT I: STRICT PRODUCTS LIABILITY – FAILURE TO WARN

46. Plaintiff repeats and realleges all previous paragraphs.

47. Cook Filters were defective and unreasonably dangerous when they left the possession of the Defendants in that they contained warnings insufficient to alert consumers, including Plaintiff and Decedent, of the dangerous risks associated with the subject product, including but not limited to the risk of tilting, perforation, fracture and migration which are associated with and did cause serious injury and/or death.

48. Information provided by Cook to the medical community and to consumers concerning the safety and efficacy of its Cook Filters did not accurately reflect the serious and potentially fatal adverse events Decedent could suffer.

49. At all times relevant hereto, the Cook Filters were dangerous and presented a substantial danger to patients who were implanted with the Cook Filter, and these risks and dangers were known or knowable at the times of distribution and implantation in Decedent. Ordinary consumers would not have recognized the potential risks and dangers the Cook Filters posed to patients, because their use was specifically promoted to improve the health of such patients.

50. Had adequate warnings and instructions been provided, Decedent would not have been implanted with the Cook filter and would not have been at risk of the harmful injuries described herein. The Cook Defendants failed to provide warnings of such risks and dangers to Decedent and their medical providers as described herein. Neither Decedent, nor Decedent's physicians knew, nor could they have learned through the exercise of reasonable care, the risks of serious injury and/or death associated with and/or caused by Cooks' Filters.

51. Cook Defendants knew or had knowledge that the warnings that were given failed to properly warn of the increased risks of serious injury and/or death associated with and/or caused by Cook Filters.

52. Decedent, individually and through his implanting physician, reasonably relied upon the skill, superior knowledge and judgment of the Cook Defendants.

53. Cook Defendants were under a continuing duty to warn Decedent and his physicians of the dangers associated with the filter.

54. Safer alternatives were available that were effective and without risks posed by Cook's Filters.

55. As a direct and proximate result of the Cook Filter's defects, as described herein, Decedent suffered permanent and continuous injuries, pain and suffering, disability and impairment, and death. Further, Decedent incurred medical bills related to care due to the Cook Filter's defects.

56. The death of Robert Gallegos has caused Plaintiff Angela Gallegos and the eligible class members to sustain damages by suffering, mental anguish, loss of services, society, companionship, comfort, protection, instruction, guidance, counseling, training, and support. Plaintiff seeks compensable funeral and medical expenses as well as other statutory economic losses resulting from the death of her son.

57. By reason of the foregoing, Cook Defendants are liable to Plaintiff for damages as a result of their failure to warn and/or adequately warn the Decedent and his healthcare professionals about the increased risk of serious injury and death caused by their defective Cook filters.

WHEREFORE, Plaintiff demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together with interest, the costs of suit and attorneys' fees, and other such other and further relief as this Court deems just and proper.

COUNT II: STRICT PRODUCTS LIABILITY – DESIGN DEFECT

58. Plaintiff repeats and realleges all previous paragraphs.

59. Cook Defendants have a duty to provide adequate warnings and instructions for their products including their Cook Filters, to use reasonable care to design a product that is not unreasonably dangerous to users.

60. At all times relevant to this action, Cook Defendants designed, tested, manufactured, packaged, labeled, marketed, distributed, promoted and sold their Cook Filters, placing the devices into the stream of commerce.

61. At all times relevant to this action, Cook's Filters were designed, tested, inspected, manufactured, assembled, developed, labeled, sterilized, licensed, marketed, advertised, promoted, sold, packaged, supplied and/or distributed by Cook Defendants in a condition that was defective and unreasonably dangerous to consumers, including Decedent.

62. Cook Filters are defective in their design and/or formulation in that they are not reasonably fit, suitable, or safe for its intended purpose and/or its foreseeable risks exceed the benefits associated with their design and formulation.

63. Cook Filters were expected to reach, and did reach, users and/or consumers including Decedent, without substantial change in the defective and unreasonably dangerous condition in which they were manufactured and sold.

64. Physicians implanted as instructed via the Instructions for Use and in a foreseeable manner as normally intended, recommended, promoted, and marketed by the Cook Defendants. Decedent received and utilized Cook Filters in a foreseeable manner as normally intended recommend, promoted, and marketed by the Cook Defendants.

65. Cook Filters were and are unreasonably dangerous in that, as designed, failed to perform safely when used by ordinary consumers, including Decedent, including when the filters were used as intended and in a reasonably foreseeable manner.

66. Cook Filters were and are unreasonably dangerous and defective in design or formulation for their intended use in that, when they left the hands of the manufacturers and/or supplier, they posed a risk of serious vascular and other serious injury which could have been reduced or avoided, inter alia, by the adoption of a feasible reasonable alternative design. There were safer alternative designs for the like products.

67. Cook Filters were insufficiently tested and caused harmful adverse events that outweighed any potential utility.

68. Cook Filters, as manufactured and supplied, were defective due to inadequate warnings, and/or inadequate clinical trials, testing, and study, and inadequate reporting regarding the results of the clinical trials, testing and study.

69. Cook Filters, as manufactured and supplied, were defective due to its no longer being substantially equivalent to its predicate device with regard to safety and effectiveness.

70. Cook Filters as manufactured and supplied by the Cook Defendants are and were defective due to inadequate post-marketing warnings or instructions because, after Cook Defendants knew or should have known of the risk of injuries from use and acquired additional knowledge and information confirming the defective and dangerous nature of its Cook Filters,

Cook Defendants failed to provide adequate warnings to the medical community and the consumers, to whom Cook Defendants were directly marketing and advertising; and further, Cook Defendants continued to affirmatively promote their Cook Filters as safe and effective and as safe and effective as their predicate device.

71. As a direct and proximate result of the Cook Filter's defects, as described herein, Decedent suffered permanent and continuous injuries, pain and suffering, disability and impairment, and death. Further, Decedent incurred medical bills related to care due to the Cook Filter's defects.

72. The death of Robert Gallegos has caused Plaintiff Angela Gallegos and the eligible class members to sustain damages by suffering, mental anguish, loss of services, society, companionship, comfort, protection, instruction, guidance, counseling, training, and support. Plaintiff seeks compensable funeral and medical expenses as well as other statutory economic losses resulting from the death of her son.

WHEREFORE, Plaintiff demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together with interest, the costs of suit and attorneys' fees, and other such other and further relief as this Court deems just and proper.

COUNT III: NEGLIGENCE

73. Plaintiff repeats and realleges all previous paragraphs.

74. At all times relevant to this cause of action, the Cook Defendants were in the business of designing, developing, manufacturing, marketing and selling sophisticated medical devices, including its Cook Filters.

75. At all times relevant hereto, the Cook Defendants were under a duty to act reasonably to design, develop, manufacture, market and sell a product that did not present a risk of harm or injury to the Decedent and to those people receiving their Filters.

76. At the time of manufacture and sale of the Cook Filters, the Cook Defendants knew or reasonably should have known the Cook Filters:

- a. were designed and manufactured in such a manner so as to present an unreasonable risk of fracture of portions of the device, as aforesaid;
- b. were designed and manufactured so as to present an unreasonable risk of migration of the device and/or portions of the device, as aforesaid;
- c. were designed and manufactured to have unreasonable and insufficient strength or structural integrity to withstand normal placement within the human body; and/or
- d. were designed and manufactured so as to present an unreasonable risk of perforation and damage to the vena caval wall.

77. Despite the aforementioned duty on the part of the Cook Defendants, they committed one or more breaches of their duty of reasonable care and were negligent in:

- a. unreasonably and carelessly failing to properly warn of the dangers and risks of harm associated with the Cook Filters, specifically its incidents fracture, migration, perforation and other failure;
- b. unreasonably and carelessly manufacturing a product that was insufficient in strength or structural integrity to withstand the foreseeable use of normal placement within the human body;
- c. unreasonably and carelessly designed a product that was insufficient in strength or structural integrity to withstand the foreseeable use of normal placement within the human body; and
- d. unreasonably and carelessly designed a product that presented a risk of harm to the Plaintiff and others similarly situated in that it was prone to fail.

78. As a direct and proximate result of the Cook Filter's defects, as described herein, Decedent suffered permanent and continuous injuries, pain and suffering, disability and

impairment, and death. Further, Decedent incurred medical bills related to care due to the Cook Filter's defects.

79. The death of Robert Gallegos has caused Plaintiff Angela Gallegos and the eligible class members to sustain damages by suffering, mental anguish, loss of services, society, companionship, comfort, protection, instruction, guidance, counseling, training, and support. Plaintiff seeks compensable funeral and medical expenses as well as other statutory economic losses resulting from the death of her son.

WHEREFORE, Plaintiff, demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together with interest, the costs of suit and attorneys' fees, and such other an further relief as this Court deems just and proper.

COUNT IV: NEGLIGENCE PER SE

(Violation of 21 U.S.C. §§321, 331, 352 and 21 C.F.R. §§1.21, 801, 803, 807, 820)

80. Plaintiff repeats and realleges all previous paragraphs.

81. At all times herein mentioned, Defendants had an obligation not to violate the law, including the Federal Food, Drug and Cosmetic Act and the applicable regulations, in the manufacture, design, testing, production, processing, assembling, inspection, research, promotion, advertising, distribution, marketing, promotion, labeling, packaging, preparation for use, consulting, sale, warning and post-sale warning and other communications of the risks and dangers of Cook IVC Filters.

82. By reason of its conduct as alleged herein, Cook violated provisions of statutes and regulations, including but not limited to, the following:

- a. Cook violated the Federal Food, Drug and Cosmetic Act, 21 U.S.C. §§ 331 and 352, by misbranding its Cook IVC Filters;

- b. Cook violated the Federal Food, Drug and Cosmetic Act, 21 U.S.C. §321 in making statements and/or representations via word, design, device or any combination thereof failing to reveal material facts with respect to the consequences that may result from the use of Cook IVC Filters to which the labeling and advertising relates;
- c. Cook violated 21 C.F.R. §1.21 in misleading the consumers and patients by concealing material facts in light of representations made regarding safety and efficacy of its Cook IVC Filters;
- d. Cook violated 21 C.F.R. §801 in mislabeling its Cook IVC Filters as to safety and effectiveness of its products and by failing to update its label to reflect post-marketing evidence that Cook IVC Filters were associated with an increased risk of injuries due to tilting, fracture, migration and perforation;
- e. Cook violated 21 C.F.R. §803 by not maintaining accurate medical device reports regarding adverse events of tilting, fracture, migration, perforation and complex removal procedures and/or misreporting these adverse events maintained via the medical device reporting system;
- f. Cook violated 21 C.F.R. §807 by failing to notify the FDA and/or the consuming public when its Cook IVC Filters were no longer substantially equivalent with regard to safety and efficacy with regard to post-marketing adverse events and safety signals; and
- g. Cook violated 21 C.F.R. §820 by failing to maintain adequate quality systems regulation including, but not limited to, instituting effective corrective and preventative actions,

83. As a direct and proximate result of the Cook Filter's defects, as described herein, Decedent suffered permanent and continuous injuries, pain and suffering, disability and impairment, and death. Further, Decedent incurred medical bills related to care due to the Cook Filter's defects.

84. The death of Robert Gallegos has caused Plaintiff Angela Gallegos and the eligible class members to sustain damages by suffering, mental anguish, loss of services, society, companionship, comfort, protection, instruction, guidance, counseling, training, and support. Plaintiff seeks compensable funeral and medical expenses as well as other statutory economic losses resulting from the death of her son.

WHEREFORE, Plaintiff demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together with interest, the costs of suit and attorneys' fees, and other such other and further relief as this Court deems just and proper.

COUNT V: BREACH OF EXPRESS WARRANTY

85. Plaintiff repeats and realleges all previous paragraphs. Decedent, through his medical providers, purchased his Cook Filter from the Cook Defendants.

86. At all times relevant to this cause of action, the Cook Defendants were merchants of goods of the kind including medical devices and vena cava filters (i.e., Cook Filters).

87. At the time and place of sale, distribution and supply of the Cook Filter to Decedent (and to other consumers and the medical community), Cook expressly represented and warranted in their marketing materials, both written and orally, and in the IFUs, that the Cook Filters were safe, well-tolerated, efficacious, and fit for their intended purpose and were of marketable quality, that they did not produce any unwarned-of dangerous side effects, and that they were adequately tested.

88. At the time of Decedent's purchase from the Cook Defendants, the Cook Filters was not in a merchantable condition and the Cook Defendants breached their expressed warranties, in that the filter:

- a. was designed in such a manner so as to be prone to a unreasonably high incident of fracture, perforation of vessels and organs, and/or migration;
- b. was designed in such a manner so as to result in an unreasonably high incident of injury to the organs of its purchaser; and
- c. was manufactured in such a manner so that the exterior surface of the Cook Filter was inadequately, improperly and inappropriately designed causing the device to weaken and fail.

89. As a direct and proximate result of the Cook Filter's defects, as described herein, Decedent suffered permanent and continuous injuries, pain and suffering, disability and impairment, and death. Further, Decedent incurred medical bills related to care due to the Cook Filter's defects.

90. The death of Robert Gallegos has caused Plaintiff Angela Gallegos and the eligible class members to sustain damages by suffering, mental anguish, loss of services, society, companionship, comfort, protection, instruction, guidance, counseling, training, and support. Plaintiff seeks compensable funeral and medical expenses as well as other statutory economic losses resulting from the death of her son.

91. By reason of the foregoing, the Cook Defendants are liable to Plaintiff for damages as a result of their breach express warranty.

WHEREFORE, Plaintiff demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together with interest, the costs of suit and attorneys' fees, and other such other and further relief as this Court deems just and proper.

COUNT VI: BREACH OF IMPLIED WARRANTY

92. Plaintiff repeats and realleges all previous paragraphs.

93. At all relevant and material times, the Cook Defendants manufactured, distributed, advertised, promoted, and sold its Cook Filters.

94. At all relevant times, the Cook Defendants intended its Cook Filters be used in the manner that Decedent and his medical providers in fact used them.

95. Cook impliedly warranted their Cook Filters to be of merchantable quality, safe and fit for the use for which the Cook Defendants intended them and for which Decedent in fact used them.

96. The Cook Defendants breached their implied warranties as follows:

- a. Cook failed to provide the warning or instruction and/or an adequate warning or instruction which a manufacturer exercising reasonable care would have provided concerning that risk, in light of the likelihood that its Cook Filters would cause harm;
- b. Cook manufactured and/or sold their Cook Filters and said filters did not conform to representations made by the Cook Defendants when they left their control;
- c. Cook manufactured and/or sold their Cook Filters which were more dangerous than an ordinary consumer would expect when used in an intended or reasonably foreseeable manner, and the foreseeable risks associated with the Cook Filters' design or formulation exceeded the benefits associated with that design. These defects existed at the time the products left the Cook Defendants' control; and
- d. Cook manufactured and/or sold their Cook Filters when they deviated in a material way from the design specifications, formulas or performance standards or from otherwise identical units manufactured to the same design specifications, formulas, or performance standards, and these defects existed at the time the products left the Cook Defendants' control.

97. The Cook Defendants' marketing of their Cook Filters was false and/or misleading.

98. Decedent, through his attending physicians, relied on these representations in determining which IVC filter to use for implantation in the Decedent.

99. Cook's filters were unfit and unsafe for use by users as they posed an unreasonable and extreme risk of injury to persons using said products, such as the Decedent, and accordingly the Cook Defendants breached their expressed warranties and the implied warranties associated with the product.

100. The foregoing warranty breaches were a substantial factor in causing Decedent's injuries, damages, and death as alleged.

101. As a direct and proximate result of the Cook Filter's defects, as described herein, Decedent suffered permanent and continuous injuries, pain and suffering, disability and impairment, and death. Further, Decedent incurred medical bills related to care due to the Cook Filter's defects.

102. The death of Robert Gallegos has caused Plaintiff Angela Gallegos and the eligible class members to sustain damages by suffering, mental anguish, loss of services, society, companionship, comfort, protection, instruction, guidance, counseling, training, and support. Plaintiff seeks compensable funeral and medical expenses as well as other statutory economic losses resulting from the death of her son.

103. By reason of the foregoing, Defendants are liable to the Plaintiffs for damages as a result of its breaches of implied warranty.

WHEREFORE, Plaintiff demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together with interest, the costs of suit and attorneys' fees, and other such other and further relief as this Court deems just and proper.

**COUNT VII: VIOLATIONS OF NEW MEXICO LAW PROHIBITING CONSUMER
FRAUD AND UNFAIR DECEPTIVE TRADE PRACTICES**

104. Plaintiff repeats and realleges all previous paragraphs.

105. The Cook Defendants had a statutory duty to refrain from unfair or deceptive acts or practices in the sale and promotion of Cook Select Filters to Decedent.

106. The Cook Defendants engaged in unfair, unconscionable, deceptive, fraudulent and misleading acts or practices in violation of New Mexico's consumer protection laws. NMSA §§ 57-12-1 *et seq.*; NMSA §§ 57-15-1, *et seq.*

107. Through its false, untrue and misleading promotion of Cook Filters, the Cook Defendants induced Decedent to purchase and/or pay for the purchase of the Cook Filter at issue.

108. The Cook Defendants misrepresented the alleged benefits and characteristics of Cook's Filters; suppressed, omitted, concealed, and failed to disclose material information concerning known adverse effects of Cook Filters; misrepresented the quality and efficacy of Cook Filters as compared to much lower-cost alternatives; misrepresented and advertised that Cook Filters were of a particular standard, quality, or grade that they were not; misrepresented Cook Filters in such a manner that later, on disclosure of the true facts, there was a likelihood that Decedent or his medical providers would have opted for an alternative IVC Filter or method of preventing pulmonary emboli.

109. The Cook Defendants' conduct created a likelihood of, and in fact caused, confusion and misunderstanding. The Cook Defendants' conduct misled, deceived, and damaged Decedent, and the Cook Defendants' fraudulent, misleading, and deceptive conduct was perpetrated with an intent that Decedent and his medical providers rely on said conduct by purchasing and/or paying for a purchase of a Cook IVC Filter. Moreover, the Cook Defendants knowingly took advantage of Decedent, who was reasonably unable to protect his interests due to ignorance of the harmful adverse effects of Cook's Filters.

110. The Cook Defendants' conduct was willful, outrageous, immoral, unethical, oppressive, unscrupulous, unconscionable, and substantially injurious to Decedent and offends the public conscience.

111. Decedent purchased his Cook Filter primarily for personal, family, or household purposes.

112. As a result of the Cook Defendants' violative conduct in New Mexico and throughout the United States, Decedent purchased and/or paid for a purchase of a Cook Filter that was not made for resale.

WHEREFORE, Plaintiff demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together with interest, the costs of suit and attorneys' fees, and other such other and further relief as this Court deems just and proper.

COUNT VIII: PUNITIVE DAMAGES

113. Plaintiff repeats and realleges all previous paragraphs.

114. At all times material hereto, the Cook Defendants knew or should have known their Cook Filters were inherently dangerous with respect to the risk of tilt, fracture, migration and/or perforation.

115. At all times material hereto, the Cook Defendants attempted to misrepresent and did knowingly misrepresent facts concerning the safety of their Cook Filters.

116. The Cook Defendants' misrepresentations included knowingly withholding material information from the medical community and the public, including Decedent's physicians, concerning the safety of their Cook Filters. The Cook Defendants' conduct was willful, wanton, and undertaken with a conscious indifference to the consequences that consumers of their product faced, including Decedent.

117. At all times material hereto, Cook knew and recklessly disregarded the fact that their Cook IVC Filters have an unreasonably high rate of tilt, fracture, migration and/or perforation.

118. Notwithstanding the foregoing, the Cook Defendants continued to market their Cook Filters aggressively to consumers, including the Decedent, without disclosing the aforesaid side effects.

119. The Cook Defendants knew of their Cook Filters' lack of warnings regarding the risk of fracture, migration, and/or perforation, but intentionally concealed and/or recklessly failed to disclose that risk and continued to market, distribute, and sell their Filters without said warnings so as to maximize sales and profits at the expense of the health and safety of the public, including Decedent, in conscious disregard of the foreseeable harm caused by Cook Filters.

120. The Cook Defendants' intentional and/or reckless failure to disclose information deprived the Decedent's physicians of necessary information to enable them to weigh the true risks of using Cook Filters against their benefits.

121. As a direct and proximate result of the Cook Defendants' willful, wanton, careless, reckless, conscious, and deliberate disregard for the safety and rights of consumers including the Decedent, Decedent suffered severe and permanent physical and emotional injuries and death, as described with particularity, above. Decedent endured pain, suffering, and loss of enjoyment of life; and suffered economic loss, including incurring significant expenses for medical care and treatment and lost wages.

122. The Cook Defendants' aforesaid conduct was committed with knowing, conscious, careless, reckless, willful, wanton, and deliberate disregard for the safety and rights of consumers including the Decedent, thereby entitling the Plaintiff to punitive damages in an amount appropriate to punish the Cook Defendants and deter them from similar conduct in the future.

WHEREFORE, Plaintiff demands judgment against the Cook Defendants and seeks damages, including compensatory damages, exemplary damages, and punitive damages, together

with interest, the costs of suit and attorneys' fees, and other such other and further relief as this Court deems just and proper.

TOLLING OF THE LIMITATIONS PERIOD

123. The Cook Defendants, through their affirmative misrepresentations and omissions, actively concealed from the Decedent and Decedent's healthcare providers the true and significant risks associated with Cook Filters.

124. As a result of the Cook Defendants' actions, Decedent and his prescribing physicians were unaware, and could not have reasonably known or have learned through reasonable diligence, that Decedent had been exposed to the risks identified in this Complaint, and that those risks were the result of Defendants' acts, omissions, and misrepresentations.

125. Accordingly, no limitations period ought to accrue until such time as Decedent knew or reasonably should have known of some causal connection between Decedent being implanted with a Cook Filter and the harm Decedent suffered as a result.

126. Additionally, the accrual and running of any applicable statute of limitations have been tolled by reason of the Cook Defendants' fraudulent concealment.

127. Additionally, the Cook Defendants are equitably estopped from asserting any limitations defense by virtue of their fraudulent concealment and other misconduct as described.

128. Additionally, the limitations period ought to be tolled under principles of equitable tolling.

PRAYER FOR RELIEF

129. WHEREFORE, Plaintiff demands judgment against the Cook Defendants as follows:

- a. Compensatory damages for Decedent, including without limitation past medical expenses; pain and suffering; emotional distress; loss of enjoyment of life; lost wages and loss of earning capacity; and consequential damages;
- b. Compensatory damages for Plaintiff and the eligible wrongful death class members, including without limitation suffering, mental anguish, loss of services, society, companionship, comfort, protection, instruction, guidance, counseling, training, support, funeral expenses, medical expenses, and other statutory economic losses;
- c. Punitive damages in an amount sufficient to punish Defendants and set an example;
- d. Disgorgement of profits;
- e. Restitution;
- f. Costs and fees of this action, including reasonable attorney's fees;
- g. Prejudgment interest and all other interest recoverable; and
- h. Such other additional and future relief as Plaintiff may be entitled to in law or in equity according to the claims pled herein.

DEMAND FOR JURY TRIAL

Plaintiff respectfully requests trial by jury in the above case as to all issues.

Respectfully submitted,

SIFERS JENSEN PALMER
